

WELCOME TO THE WORLD OF **VISIONBODY**

THE NUMBER ONE BRAND FOR WIRELESS EMS TRAINING

VISIONBODY

THE PERFECT MATCH BETWEEN FITNESS AND TECHNOLOGY

Visionbody is the number one brand for **wireless EMS training**. It is in the **forefront of wearable fitness technology** and leads the re-conceptualization of the health and fitness industry in the 21st century.

Using both electrical muscle stimulation (EMS) and electrical muscle activation (EMA) technologies, the Visionbody System provides a **streamlined approach to any fitness goal**, especially regarding body composition, strength and endurance.

Simply put your Visionbody garment on, attach your Visionbody stimulation box, start your Visionbody app, select a training program and you are ready to go!

WIRELESS EMS TRAINING

CUTTING-EDGE FITNESS

WITH UNPRECEDENTED FREEDOM

A Visionbody System EMS training is more intense than a traditional training. A **20-minute workout** per week is equivalent to a 3 to 4 hour traditional workout depending on the traditional activity and its intensity.

Being a **completely wireless system**, with no cables hindering body movement, and operating over Bluetooth, the Visionbody System delivers **complete freedom** to train in any dry location, both indoors and outdoors, at any time.

It is designed to be incorporated into many types of sports and activities such as Functional Fitness · CrossFit · Circuit Training · HIIT · Boxing · MMA · Spinning · Running · Tai Chi · Pilates · Yoga · Zumba · Dance · Walking.

CUSTOMIZABLE TRAININGS

TO STREAMLINE ANY FITNESS GOAL

A Visionbody System, depending on its edition, can offer a choice of up to **8 main programs**. The programs are: Basic, Activation, Continuous, Endurance, Strength, Fat-Burning, Cool Down, Special and Recovery. The chosen program determines the stimulus, which will be applied to the muscle groups, either in isolation or simultaneously, throughout a training session.

The Visionbody System can cater to both **single and group training sessions**. The basic components are the Visionbody Box and Visionbody Software. Depending on the Visionbody System edition, the number of Visionbody Boxes can be increased to allow for group sessions with **unlimited users**, each with their own **individualised training settings**.

The choice of Visionbody garment to be used with a Visionbody Box is personal choice.

STATE-OF-THE-ART FEATURES

FOR TOTAL TRAINING CONTROL AND MONITORING

No other EMS product offers as many training support features as the Visionbody System.

With its user-friendly muscle group visuals, the Visionbody System delivers the **ultimate facilitation in training control and monitoring**. Training settings can be instantly changed with ease at any time, even during a training, to deliver, each and every time, an optimal training experience tailored to any training goal.

For single Visionbody Box editions, the previous training settings can be saved, with the last saved values automatically being retained to start the next training session.

Unique to the Visionbody System is its ability to present helpful **ECG data**, in the form of a heart rate graph and a current heart rate indicator, at any time a training session is paused or terminated.

VISIONBODY GARMENTS

FOR OPTIMAL COMFORT AND RESULTS

The Visionbody garments are fitness wearables, which are made from a skin-friendly material, which provides antibacterial features, maximum flexibility and optimal electrode conductivity.

The **Visionbody Powersuit** is a full-body suit, which allows for all muscle groups of the body to be trained to improve overall body composition, strength and endurance.

The **Visionbody Powerpant** focuses purely on the lower body region, making it ideal for those wanting to solely tone and strengthen their abdomen, legs, butt and lower back. Even reduce cellulite.

Unlike other EMS brands, these garments does not require any wetting with water or gels before any training starts. Nor do they require the wearing of any special undergarment. Instead, perspiration from warm up excercises ensures for the necessary electrode conductivity.

The Visionbody garments come in six sizes - XS, S, M, L, XL, XXL - for both men and women. Other sizes can be made on request.

VISIONBODY VEST

FOR DEMO TRAINING AND LIMITED MOBILITY

Understanding that those inquisitive about EMS training would like the opportunity of a **demo training**, Visionbody has developed the **Visionbody Vest**. A garment, which through its design, also brings the benefits of EMS to those with **limited mobility** to improve their metabolism, blood circulation and muscle movement.

The Visionbody Vest is designed to be easily wrapped around the body and focuses on applying stimulation to the arms, chest, back, abdomens, buttocks and legs.

As the Visionbody Vest can work even without any warm-up exercises, it is necessary to wet its electrode areas with a conductive water spray prior to its use. This ensures the electrodes maintain proper contact with the weaker parts of the body. The Visionbody Vest also requires the wearing of an undergarment.

VISIONBODY EDITIONS

FOR FITNESS STUDIOS AND GYMS

The Visionbody System can cater to **any training scenario**, ensuring everyone can gain access to and incorporate the benefits of EMS technology into their fitness regimes.

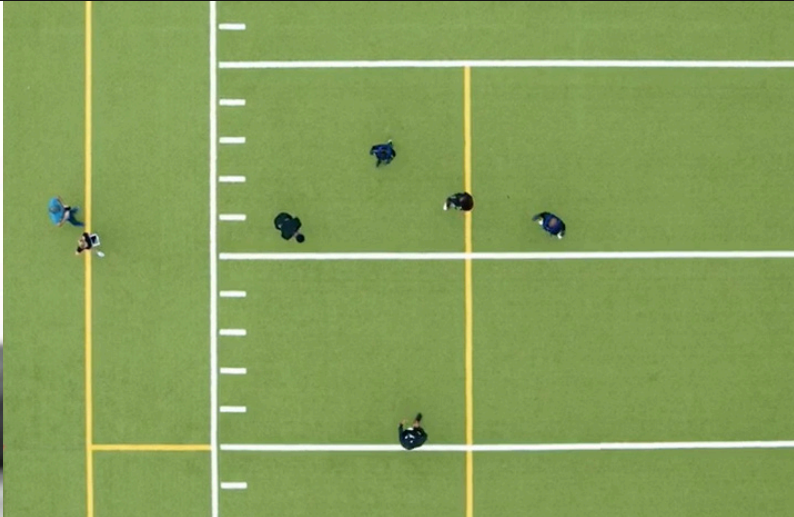

Visionbody Pro is for fitness studios offering EMS group trainings to up to 8 people.

Visionbody ProMaxx is for large gyms offering trainings of more than 20 people at the same time. The number of participants is limitless.

VISIONBODY EDITIONS

FOR PROFESSIONAL ATHLETES

Visionbody Pro-Athlete is a specialty edition unique to Visionbody and on the EMS fitness market. It was developed at the request of professional athletes looking for a natural edge against the competition. It addresses all the needs of a professional athlete in one system.

VISIONBODY EDITIONS

FOR PRIVATE USERS

Visionbody Personal is a one-to-one Visionbody Box and Visionbody Powersuit solution designed for private customers, who wish to train independently at a location of their choice, whether at home, outdoors, at a gym together with a personal trainer or even on a trip.

Visionbody Legs is an edition, which combines the Visionbody Powerpant with the Visionbody Box to focus on the lower body region.

With the mission to build a solid brand throughout the world, Visionbody offers its **franchise program** to those, who wish to establish their own studios using Visionbody's distinct branding and its Visionbody System editions with other fitness products to provide an unforgettable top class training experience to their customers. All this under the name **VB20 studios** and with the marketing, training and technical support of Visionbody.

Come join our family and be in the forefront of re-conceptualization the health and fitness industry.
